## The Story Behind REBORN

Infected Mushroom, the Israeli-American-based electronic music duo, will release a brand new studio album in February 2024 titled **'REBORN'**. The album features 9 tracks, all of which are re-imagined and are new re-recordings of some of the band's classic tracks from the 90s and beyond.

The album's story begins in 2018 when Infected Mushroom started working on the repertoire they'll play live in one of their iconic annual 'IM' special live concerts held in Israel.

“As the work progressed on the show, we realized that we must play some very old tracks and fit them to nowadays sound standards,” says Infected Mushroom's Amit Duvdevani. So naturally you'd say – let's check the backups, but we ran into a little tiny problem, the tracks were so old that we didn't even have backups back then!”

So what did Infected Mushroom do? They went back into the studio and reimagined some of their most sought-after classic tracks but with the mindset, knowledge, and production techniques of today.

"We found ourselves sitting in the studio & reliving that era in the '90s by replaying, re-recording 'Release Me,'" says Erez Eisen. "That's how 'Release Me REBORN' was created, and

# INFECTED MUSHROOM

we knew that we needed to do this process again and recreate a few more timeless tracks that needed to get a better sound envelope to meet nowadays dancefloors."

The album's writing process took almost three years with the hectic Mushrooms schedule, and the result is a collection of 9 tracks that are both familiar to fans worldwide but sounding brand new. The re-recorded tracks retain the original composition but with a fresh & tight sound production to some very old tunes.

"We're also proud to be able to release **'REBORN'** in a variety of formats, not just digital downloads," says both Eisen & Duvdevani. "We know how our fans appreciate this, so expect also a limited edition 2LP with a deluxe gatefold cover, special colored vinyl, a stickers sheet, and even a CD for those who kept asking for it."

**'REBORN'** is a must-have album for Infected Mushroom fans and the Psytrance community. It's a celebration of the duo's groundbreaking contributions to the genre and a testament to their enduring legacy.

**'REBORN'** is available for Pre-Order as of Nov 29th on all major streaming platforms, and in the formats of a limited edition double-gatefold high-quality vinyl, and a CD.

**'REBORN'** is scheduled for release on February 9th, 2024, and will be preceded by two single releases, the 1<sup>st</sup>, 'Release Me REBORN' (Nov 29<sup>th</sup>), and the follow-up 2<sup>nd</sup> single 'Dream Theater REBORN (Dec 22<sup>nd</sup>).
